Reviewer's report

Title: Predictors of effectiveness of early intervention on children with intellectual disability: A retrospective cohort study

Version: 3 Date: 11 June 2014

Reviewer: Steven Lamm

Reviewer's report:

I find this paper satisfactory with one change needed.

The last sentence of the abstract should read:

"The effectiveness is demonstrable in boys and more prominent in children whose mothers had a low educational level."

With that change made, I would approve this paper for publication.
