Reviewer’s report

Title: Parenting Stress: A Cross-Sectional Analysis of Associations with Childhood Obesity, TV Viewing, and Physical Activity

Version: 1 Date: 9 August 2014

Reviewer: Julie Lumeng

Reviewer’s report:

It is very rare that I review a manuscript and do not find any issues that need to be addressed, but this is the situation here. This is a very well written manuscript on a timely topic. The writing and analyses are clear and logical. The hypotheses are clearly stated and the methods and results follow logically from the hypotheses presented. One of the greatest strengths of the manuscript is that the authors are very clear about the limitations of their own work and they outline these limitations in detail. The contribution to the literature is somewhat modest, but appropriate for this venue.

Major Compulsory Revisions

None

Minor Essential Revisions

None

Discretionary Revisions

None

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
