Title: Parenting Stress: A Cross-Sectional Analysis of Associations with Childhood Obesity, TV Viewing, and Physical Activity

Version: 1 Date: 19 August 2014

Reviewer’s report:

Minor Essential Revisions

Given that the authors included confidence intervals for the ORs as well as OR confidence intervals from reports in the literature, it would be appropriate to include some post-hoc power analyses. This information would then be helpful to obtain appropriate sample size estimates for future work.

In addition, reliability of the PSI-SF is needed.
