Dear Editor-in-chief of *BMC Pediatrics*

I would like to make some comments regarding to the revised version.

1. Copyediting:

After reading through your manuscript, we feel that the quality of written English needs to be improved before the manuscript can be considered further.

We advise you to seek the assistance of a fluent English speaking colleague, or to have a professional editing service correct your language. Please ensure that particular attention is paid to the abstract.

**Answer:** The manuscript was reviewed by a native in the English language as suggested by the reviewer.

2. Please include page numbers and highlight all revisions to the manuscripts using red text or some other type of identifier.

**Answer:** The changes are indicated as suggested.

Editor's comment:

"Please send this back to the authors and ask them to get help with the English grammar. They claim to have had help with that but I found several obvious problems.

Example: (5th paragraph in discussion) "However, children and adolescents also has been conducted study that provides cutoff for WC by percentile, to use the results as a tool to impact public health advice to young people 30 (Fernandez JR)." This is so poorly written I can't even interpret the meaning. Additionally, the name in parentheses should be removed since the reference number is already in place.

**Answer:** The manuscript was reviewed at all, including this paragraph

Example: In the title the word "predictor" should be "predictors"

**Answer:** This alteration was made.
