Reviewer’s report

Title: What do bereaved parents want from professionals after the sudden death of their child? A structured narrative review of the literature.

Version: 3 Date: 25 September 2014

Reviewer: Michaela Barnard

Reviewer’s report:

Minor essential revisions

1. Page 2, line 29. The title of the paper has been changed to systematic review but here it is referred to as a narrative review. Needs consistency.

2. Page 22, Line 561. First column of table 2 states authors and years of publication. There are no years of publication for any paper. Years of publication need inserting for each paper, in terms of the reader, interpretation of the table would be greatly assisted by this.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
