Reviewer's report

**Title:** Brazilian Portuguese translation and cross-cultural adaptation of the "Caregiver Priorities and Child Health Index of Life with Disabilities" (CPCHILD) questionnaire

**Version:** 2  
**Date:** 19 December 2013

**Reviewer:** Ines Mattos

**Reviewer's report:**

**Major compulsory revisions**

In general, the authors complied with the suggested revisions, either by adding to the text itself or by submitting two new files, along with the revised manuscript.

Since these two files contain important information that is not completely reported in the manuscript, I would suggest that links to both of them should be made accessible to readers. I see no sense in presenting the transcultural adaptation of an instrument to another language/population, if this version is not available for readers who would want to use it.

**Minor essential revisions**

They were made by the authors.

**Level of interest:** An article whose findings are important to those with closely related research interests

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.

**Declaration of competing interests:**

I declare that I have no competing interests
