Reviewer's report

Title: Unusually large, segmental, circular vascular malformation of the small intestine in a female toddler with hematochezia

Version: 1  Date: 7 November 2013

Reviewer: Matias Epifanio

Reviewer's report:

These are recommendations for improvement which the author can choose to ignore:

The clinical history of the patient is a little confused, I suggest putting some better tests laboratories and better describe the clinical presentation.
I suggest also that the conclusion is not so long

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
