Reviewer's report

Title: The Clinical And Molecular Spectrum Of Galactosemia In Patients From The Cape Town Region Of South Africa

Authors:

Howard HE Henderson (henders@ich.uct.ac.za)
Felicity FL Leisegang (leisegan@ich.uct.ac.za)
Ruth R Brown (Rbrown@pawc.wcape.gov.za)
Brian B Eley (beley@ich.uct.ac.za)

Version: 6 Date: 20 Aug 2002

Reviewer: Prof Juergen Reichardt

Level of interest: A paper whose findings are important to those with closely related research interests

Advice on publication: Accept without revision

The authors have addressed the issues raised by this reviewer satisfactorily. It should be noted that in this referee's print-out the symbols (probably micro) on p. 5 looked like infinity signs! The original version may not have the same problems.
