Reviewer's report

Title: A new growth chart for preterm babies: Babson and Benda’s chart updated with recent data and a new format

Version: 3 Date: 29 September 2003

Reviewer: Gerd G Schmalisch

Reviewer's report:

General
The manuscript was revised carefully.
The most important methodical limitations of the meta-analysis used were explained in detail in the discussion.
The reduction on a table and 3 illustrations improves the legibility.

However, the legends of Fig. 1-3 are missing.

Advice on publication: Accept after discretionary revisions

Level of interest: A paper whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Declaration of competing interests:
None
