Reviewer's report

Title: Lactobacillus casei strain GG in the treatment of infants with acute watery diarrhea: A randomized, double-blind, placebo controlled clinical trial

Version: 2 Date: 19 July 2004

Reviewer: Stefano S Guandalini

Reviewer's report:

General
The authors have successfully addressed my remarks, and I believe the paper now, as a result also of the other reviewer's notes, is much clearer and can be published.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No
