Title: Tourette Syndrome and Learning Disabilities
Review of revised re-submission

I have had the opportunity to re-review the revised manuscript above, along with the responses by the authors to my second, as well as their responses to the other reviewers. I now believe the authors have adequately addressed my comments and concerns.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No

Declaration of competing interests:

I declare that I have no competing interests.
