Reviewer's report

Title: Screening for hypoglycemia at the bedside in the neonatal intensive care unit (NICU) with the Abbott PCx glucose meter

Version: 1 Date: 10 May 2006

Reviewer: Kent Lewandrowski

Reviewer's report:

General
I have reviewed this manuscript. It is well written and presents new useful information and should be published. The only modification that I suggest is to include conventional units in the text in addition to SI units. This will make the manuscript much more readable and useful to the American readership and this is an important audience.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)
