Reviewer's report

Title: Parent-Rated Behavior Problems Associated with Overweight After Controlling for Sleep Disordered Breathing: A Prospective Study

Version: 2 Date: 5 December 2006

Reviewer: Han C Kemper

Reviewer's report:

General

The paper is well revised according the two reviewers’suggestions.
Small comments on my side:
1. In abstract add to the first paragraph that SDB is taken into consideration and include in conclusion the role of SDB.
2. In discussion: the first sentence can be deleted.
3. I miss a conclusion at the end ( can be the same as in abstract
4. is Freidman (ref 41) correct?
5. Explain in table 2 RDI
6. do the significant numbers in bold in table 3 and 4 and change withdraw in withdrawal in table 4.
