Reviewer's report

Title: Effect of maternal calcium intake during pregnancy on children blood pressure. A systematic review of the literature.

Version: 2 Date: 26 November 2006

Reviewer: Ruth Morley

Reviewer's report:

General

This is now much improved

----------------------------------------------------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

None further

----------------------------------------------------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

None further

----------------------------------------------------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

None further

What next?: Accept without revision

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No
