Reviewer's report

Title: Mild Gestational Diabetes in Pregnancy and the Adipoinsular Axis in Neonates born to mothers in the ACHOIS randomised controlled trial.

Version: 3 Date: 28 February 2007

Reviewer: David J Pettitt

Reviewer's report:

General

-------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

-------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

-------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

1) For completeness there should be a statement that the 62 women (40%) who were randomized but chose not participate in this aspect of the study are no different from the 95 who did participate.

2) The last sentence of the first paragraph of the results describes the adjustment that is shown in table 2 but the reader is referred to table 3.

What next?: Accept after discretionary revisions

Level of interest: An article of limited interest

Statistical review: No, the manuscript does not need to be seen by a statistician.
