Reviewer’s report

Title: Chronic multifocal non-bacterial osteomyelitis in hypophosphatasia mimicking malignancy

Version: 2 Date: 16 October 2006

Reviewer: Anne Grethe G Jurik

Reviewer’s report:

General:
The manuscript has been improved in accordance with the suggestions from the reviewers except an unchanged reference list. It is mainly restricted to publications from the author group. According to other groups chronic non-infectious osteomyelitis rarely involved the ribs. In my opinion is has to be stated in the discussion accompanied by relevant references.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept after minor essential revisions

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No
