Reviewer's report

Title: Application of a plain abdominal radiograph transition zone (PARTZ) in Hirschsprung’s disease: Implications for a single stage transanal pull through

Version: 4  Date: 28 December 2006
Reviewers: Hans Herfarth

Reviewer’s report:

The authors answered the concerns raised. The paper can be accepted.

General

-------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

-------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

-------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

-------------------------------------------------------------------------------

What next?: Accept without revision

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
