Reviewer’s report

Title: Risk Factors for Methamphetamine Use in Youth: A Systematic Review

Version: 2 Date: 1 July 2008

Reviewer: richard rawson

Reviewer’s report:

This is an excellent manuscript. The authors have done an excellent job of searching the literature, collecting all relevant studies, sorting them into two different sets and analyzing and summarizing results. Their introduction and discussions are written economically with appropriate references; their analytic techniques appear very sound; their results are presented clearly. I can find no significant weaknesses in this paper.

Level of interest: An article of outstanding merit and interest in its field

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
