Reviewer’s report

Title: Hyperbaric treatment for children with autism: a multicenter, randomized, double-blind, controlled trial

Version: 2 Date: 1 February 2009

Reviewer: David J Posey

Reviewer’s report:

The revision has been mostly responsive to the first review. I do suggest review by a statistical expert given my previous expressed concerns about the choice of analysis and way it is presented. Many of the between group comparisons were not significant and so it would be important to not overstate the effect.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.

Declaration of competing interests:

I declare that I have no competing interests.
