Reviewer's report

Title: Prevalence and risk factors for stunting and severe stunting among under-fives in North Maluku province of Indonesia

Version: 1 Date: 13 March 2009

Reviewer: KAUSHIK BOSE

Reviewer's report:

I have gone through the manuscript. It is a very good piece of work. However, I have one major comment.

The authors are advised to present a Table in the Discussion Section comparing the levels of stunting in the present study with those reported (in the same age group) from other developing countries in Asia, Africa and South America. This will help researchers immensely. Also this will put the authors' findings into global perspective.
