Reviewer's report

Title: Genetic influences on Attention Deficit Hyperactivity Disorder symptoms from age 2 to 3: A quantitative and molecular genetic investigation.

Version: 3 Date: 15 July 2010

Reviewer: Carol Van Hulle

Reviewer's report:

The authors have made several improvements to the paper. I have only a few minor editing suggestions.

First, in table 5 rs11080121 should be grouped with the 5-HTT SNPS not SNAP25. Second, there seems to be a typo in the equation given on page 9 line 5. Third, the following sentences "A further quality control measure was through genotyping 96 random duplicates. .02% of duplicated samples were not consistent with the original genotype" should read more like "As a further quality control measure, 96 random duplicates were genotyped. Only .02% of duplicated samples were not consistent with the original genotype".

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
