Reviewer’s report

Title: Spatial Distribution of Suicide in Queensland, Australia

Version: 2 Date: 26 October 2010

Reviewer: Lei Yan

Reviewer’s report:

The authors have addressed most of the comments. I find the revision to be far better than the original manuscript. However, figure’s legend did not mention the meaning of number in brackets. (I know it is the numbers of LGAs which had suicide cases). Furthermore, I suggest that the paper might be shortened considerably in the discussion and limitation.

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
