Title: Validation of the Arabic version of the Cohen Perceived Stress Scale (PSS-10)

Version: 1 Date: 20 October 2010

Reviewer: Andy Smith

Reviewer's report:

This paper reports a study of stress and pregnancy using the Arabic version of the PSS-10. The title should be changed to reflect this. Generally the study is well-conducted and reported. It would be better to list the actual questions in each factor rather than referring to numbers (pg10).

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
