Reviewer’s report

Title: Identification of early changes in specific symptoms that predict longer-term response to atypical antipsychotics in the treatment of patients with schizophrenia

Version: 2 Date: 10 January 2011

Reviewer: Eske M. Derks

Reviewer’s report:

I think the authors responded very well to my earlier comments and to those made by the other reviewer. I have no further comments.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
