Reviewer's report

Title: Relapse according to antipsychotic treatment in schizophrenic patients: a propensity-adjusted analysis

Version: 2 Date: 24 January 2011

Reviewer: Lone Baandrup

Reviewer's report:

I believe all my criticisms have been met by the author's response. Only a few minor comments remain:

3) Reference 9 has been deleted - the authors should check if the remaining references cover the aspect of metabolic syndrome associated with antipsychotic polypharmacy, if not it should be deleted from the text.

9) I think reference 13 should be deleted since it covers the aspect of mortality which has been deleted from the text.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
