Reviewer’s report

Title: Translation and validation of the Korean confusion assessment method for the intensive care unit

Version: 3 Date: 8 April 2011

Reviewer: Maarten Menno Jeroen van Eijk

Reviewer’s report:

Major Compulsory Revisions
None

Minor Essential Revisions
Results; interrater reliability and validity of the Korean CAM-ICU
…enrolled patient was assessed one than once…..
This sentence is incomplete

Throughout the manuscript: please check the tenses (grammar) as they differ throughout the manuscript.

Discretionary Revisions
Discussion: another reason for the lower sensitivity found is that patients already on antipsychotics were excluded, therefore the most obvious delirious patients (in which the sensitivity of the CAM-ICU is highest) were not included in your sensitivity analysis.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
