Reviewer's report

Title: Post-hospitalization course and predictive signs of suicidal behavior of suicidal patients admitted to a psychiatric hospital: A 2-year prospective follow-up study

Version: 1 Date: 30 August 2012

Reviewer: Matthew Large

Reviewer's report:

Minor essential revisions
page 5 line 1, replace "supposed" with "usually considered"
page 5 line 2, replace "to remedy it proficiently is an urgent task" with "managing SB is an important responsibility"

I think the term risk factor is much better than "predictor"
please formulate a hypotheses at the end of the introduction - this can be general and need not be a null hypotheses.

Discretionary revisions
the authors might like to consider "Risk factors for suicide within a year of discharge from psychiatric hospital: a systematic meta-analysis.
Large M, Sharma S, Cannon E, Ryan C, Nielssen O.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
