Reviewer's report

Title: The impact of medication side effects on adherence among patients with schizophrenia: results of a cross-sectional nationwide survey

Version: 2 Date: 8 February 2012

Reviewer: Giovanni Abbate-Daga

Reviewer's report:

The authors extensively revised the manuscript following almost all suggestions. They also highlighted the limits of their paper as well. The most important issue is that the theoretical construct underpinning the study is now more solid. I think they improved the paper.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
