Reviewer's report

Title: Cost-effectiveness of family psychoeducation to prevent relapse in major depression: Results from a randomized controlled trial

Version: 3 Date: 19 December 2011

Reviewer: Judith Bosmans

Reviewer's report:

Major compulsory revisions
1. The authors still do not include the intervention costs into the total costs. A reasonable price should be incorporated in the main analysis and the uncertainty surrounding this price should be investigated in the sensitivity analyses. The authors themselves state "if psychoeducation is properly priced and reimbursed" so a cost for the intervention should be included in the total cost estimates.

Level of interest: An article of limited interest

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
