Reviewer's report

Title: Clinical features of delirious mania: a series of five cases and brief literature review

Version: 4 Date: 29 November 2011

Reviewer: Mark Detweiler

Reviewer's report:

The authors have markedly improved the case descriptions and the discussion.

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
