Reviewer's report

**Title:** Quality of life is predictive of relapse in schizophrenia

**Version:** 2 **Date:** 18 September 2012

**Reviewer:** Kelly Buck

**Reviewer's report:**

The authors have adequately responded to my feedback and improved the ms. The discussion section is much improved with the addition of the final paragraph regarding objective and subjective recovery implications.

**Minor Essential Revisions**

The ms needs to be reviewed for some minor spelling errors. Additionally, the added sentence on p.4 lines 92-92 is not a sentence as written. Line 306, question should be questions. The term "treatment-and cure mental health CARES to prevent relapse" is not well-known terminology and need to be rewritten.

**Level of interest:** An article of importance in its field

**Quality of written English:** Needs some language corrections before being published

**Statistical review:** Yes, but I do not feel adequately qualified to assess the statistics.
