Reviewer's report

Title: Internet-based interventions for eating disorders in adults: a systematic review

Version: 2 Date: 24 December 2012

Reviewer: Isabelle Carrard

Reviewer's report:

The authors answered satisfactorily to my comments and included changes in the manuscript that clarify the content. The article is improved with the inclusion of three more studies and with the use of ITT effects. The discussion could be shortened but otherwise I do not have any more questions or comments.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare that I have no competing interests
