Reviewer's report

Title: Oral Health Status and Treatment Needs among Psychiatric Inpatients in Rennes, France: a cross-sectional study

Version: 3 Date: 19 December 2012

Reviewer: Clement C. Azodo

Reviewer's report:

In the discussion section:
The authors only compared the results of the finding of their study with previous studies. The possible explanations for the differences noted in their study and compared studies were lacking and made the discussion relatively uninteresting. The discussion on link between DMFT with the variable assessed in table 3 was also missing so should included.

Language editing is also deemed necessary

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
