Reviewer's report

Title: Oscillometric measure of blood pressure detects association between orthostatic hypotension and depression in population based study of older adults

Version: 2 Date: 28 May 2013

Reviewer: Kathryn Rose

Reviewer's report:

You have satisfactorily addressed major concerns. Note that table 1 still needs some editorial changes. Some things are in superscript that should not be.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
