Reviewer’s report

Title: The psychosocial difficulties in brain disorders that explain short term changes in health outcomes

Version: 6  Date: 27 October 2012

Reviewer: Annet Kleiboer

Reviewer’s report:

The authors have dealt with all the issues mentioned by the reviewers and the revised manuscript shows greater consistency and focus.

Minor revision:
The authors state that they recruited a convenience sample when describing the study design (first paragraph) but later on when they describe the data collection procedures they say that they recruited consecutive patients (but further details are lacking) which confused me.

Level of interest: An article of limited interest

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
