Reviewer's report

Title: A bipolar disorder patient becoming asymptomatic after adjunctive anti-filiarasis treatment: a case report.

Version: 2 Date: 20 February 2013

Reviewer: Napoleon Waszkiewicz

Reviewer's report:

Authors satisfactory answered all my questions. The manuscript is now greatly improved.

Minor point: YMRS and DSM-IV abbreviations should be described. I realize that is clear for psychiatrist, however, as BMC Psychiatry is an open access journal, that can be read by other specialists, explanation of the abbreviation is nice.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
