Reviewer’s report

**Title:** Efficacy of depression treatments targeting first-generation immigrants: Results from a systematic review

**Version:** 2  **Date:** 7 May 2014

**Reviewer:** Nicholas Deakin

**Reviewer’s report:**

Major Compulsory Revisions: NA

Minor Essential Revisions: given that the paper is intended to influence policy, the language that the intervention was delivered in should be emphasised earlier in the paper (also in the results section) and form a column in table 4. The results section of the abstract should also emphasise the limited ethnic groups covered by the included studies

Discretionary Revisions: it would be helpful to see p values to quantify the 'statistically significant yes/no/partially' column in table 4 and the associated write up

**Level of interest:** An article of importance in its field

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.

**Declaration of competing interests:**
