Reviewer's report

Title: Treatment for illegal drug use disorders: the role of comorbid mood and anxiety disorders.

Version: 2 Date: 6 November 2013

Reviewer: Morten Hesse

Reviewer's report:

Minor essential revisions:
Change the first line in the methods section in the abstract ("Data come from...") to past tense ("Data came from...")
In the discussion, the term "health services use" is still used to refer to treatment for drug use disorders.
A limitation that should be noted is that the two main outcome variables are both measured with a single unvalidated item (having received treatment and having an unmet treatment need).

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
