Reviewer's report

**Title:** High vitamin B12 level and good treatment outcome may be associated in major depressive disorder

**Version:** 1  **Date:** 28 August 2003

**Reviewer:** Russell T Joffe

**Reviewer's report:**

General
This is an interesting study of a positive association between B12 levels and antidepressant response

Discretionary Revisions (which the author can choose to ignore)
Greater emphasis on the limits of the study esp. naturalistic treatment

Minor Compulsory Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

**Advice on publication:** Accept after discretionary revisions

**Level of interest:** A paper whose findings are important to those with closely related research interests

**Quality of written English:** Acceptable

**Declaration of competing interests:**

None
