Reviewer's report

Title: Psychosocial Correlates with Depressive Symptoms Six years after a First Episode of Psychosis as Compared with Findings from a General Population Sample.

Version: 1 Date: 13 September 2004
Reviewer: lançon christophe

Reviewer's report:

General

--------------------------------------------------------------------------------
Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)
the validity and reliability of depressive scale used in the study is not documented in th elitterature. The results and the discussion of them néeed to include these limitations.....*the first step of such study is to estimate validity and reliability of the scale use If these points are discussed the results are intersting
--------------------------------------------------------------------------------
Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)
--------------------------------------------------------------------------------
Discretionary Revisions (which the author can choose to ignore)

What next?: Unable to decide on acceptance or rejection until the authors have responded to the major compulsory revisions

Level of interest: An article of limited interest

Quality of written English: Acceptable
