Reviewer's report

Title: No evidence for association between polymorphisms in GRM3 and schizophrenia.

Version: 5 Date: 28 April 2005

Reviewer: Hiroki Shibata

Reviewer's report:

General

------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)
NONE

------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)
Typo: "GRM3" should be italicized when meaning the gene: Page 3, line 16; Page 5, line 10, 13.
Typo: Legend for Figure 1 is missing the closing bracket.

------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)
NONE

What next?: Accept after minor essential revisions

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No
