Reviewer's report

Title: Bright Light Treatment of Depression for Older Adults [ISRCTN55452501]

Version: 2 Date: 13 October 2005

Reviewer: Bjørn Bjorvatn

Reviewer's report:

General
The paper has improved substantially with the revision. I still wish the authors would add more sleep data, like total sleep length and sleep efficiency. Besides that, I have no further comments.

-------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

-------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

-------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept after discretionary revisions

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No

Declaration of competing interests:
This was answered during the first revision.
