Reviewer's report

Title: The psychometric properties of Kiddie-Schedule for Affective Disorders and Schizophrenia-present and lifetime version- Farsi Version

Version: 4 Date: 2 December 2005

Reviewer: Konstantinos Fountoulakis

Reviewer's report:

Unfortunately I think that the authors did not responded to my comments adequately, and accurately. This is especially true concerning the methods and statistical analysis. In other queries, e.g. which are the standard qualifications (if any) for a person to be suitable to apply the interview, they gave an indirect response.

Thus, regrettably I must recommend rejection of the manuscript.
