Reviewer’s report

Title: Metabolic risk factors profile associated with use of second generation antipsychotics: a cross-sectional study in a community mental health centre

Version: 2 Date: 8 January 2006

Reviewer: Robert C Smith

Reviewer’s report:

General
Deficits in English grammar and sentence style, and awkwardness of many sentences.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept after discretionary revisions

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No

Declaration of competing interests:

ITT research grants from Eli Lilly Pharmacueticial both currently and in past. Meeting travel support from Eli Lilly.
