Reviewer's report

Title: The Four-Dimensional Symptom Questionnaire (4DSQ). A validation study of a multidimensional self-report questionnaire to assess distress, depression, anxiety and somatization.

Version: 2 Date: 27 July 2006

Reviewer: Robert Ferdinand

Reviewer's report:

General

--------------------------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

--------------------------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

--------------------------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

--------------------------------------------------------------------------------------------------------

What next?: Accept without revision
