Reviewer's report

Title: Predictors of patient satisfaction with antipsychotic medication in schizophrenia: Data from a randomized double-blind trial

Version: 2 Date: 27 September 2006

Reviewer: Dieter Naber

Reviewer's report:

General
I carefully read the revised manuscript. The authors have well incorporated the changes or additions suggested by the reviewers, the quality of the manuscript has improved and I do not have any further objection to its publication

-------------------------------------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

-------------------------------------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

-------------------------------------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

-------------------------------------------------------------------------------------------------------------------

What next?: Accept without revision
