Reviewer's report

Title: Mammography stages of change in middle-aged women with schizophrenia: An exploratory analysis

Version: 1 Date: 7 July 2006

Reviewer: William Barlow

Reviewer's report:

General
The authors have addressed my previous concerns about overinterpreting the results. I do not have further comments they need to address. The Introduction in particular is very well written and clear.

-------------------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

None.

-------------------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

None

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No

Declaration of competing interests:
