Reviewer’s report

Title: Metabolic syndrome in Thai schizophrenic patients: a one-year follow-up study

Version: 5 Date: 4 April 2007

Reviewer: Paul Mackin

Reviewer’s report:

General

The manuscript is improved by highlighting the significant limitations of the study and the applicability of these data to 'real life' settings.

-----------------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

-----------------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

-----------------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

-----------------------------------------------------------------------------------------------

What next?: Accept without revision

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I have received honoraria for educational meetings from AstraZeneca, Bristol-Myers Squibb, Eli Lilly, and Janssen UK. I have no other competing interests.
