Reviewer's report

Title: Tridimensional Personality Questionnaire data on alcoholic violent offenders: specific connections to severe cluster B personality disorders and violent criminality

Version: 2 Date: 13 March 2007

Reviewer: C. Robert C Cloninger

Reviewer's report:

General
The data support utility of temperament dimensions in distinguishing primary psychopaths as antisocial personalities with low Harm Avoidance and secondary psychopaths as borderline or explosive personalities with high Harm Avoidance.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
