Reviewer's report

Title: Narcissism in patients admitted to psychiatric acute wards: its relation to violence, suicidality and other psychopathology

Version: 3 Date: 9 January 2008

Reviewer: Tilman Steinert

Reviewer's report:

I recognize that the authors have done a lot of efforts to revise and defend their manuscript according to the reviewers' comments (which have been rather similar in this case). I am not completely of the same opinion with the authors in some points, but I concede that this is not necessary in research and the manuscript actually has become much more clear and understandable, especially with respect to presentation of methods and results.

What next?: Accept without revision

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
